WORKING PAPER

This is a paper intended for a specific community of recipients. Handling and further distribution are under the sole responsibility of community members.

WORKING DOCUMENT

From:	General Secretariat of the Council
To:	Working Party on Horizontal Agricultural Questions (CAP Reform)
N° Cion doc.:	9645/18 + COR 1 + ADD 1
Subject:	Proposal for a Regulation on CAP Strategic Plans - Updated fiches on output indicators

Delegations will find attached a revised version of the updated fiches on output indicators prepared by the Commission. The changes compared to the previous version are limited to O.18 and O.20.

WK 9353/2019 REV 1

COMMON OUTPUT INDICATORS USED FOR REPORTING IN THE APR 03/09/2019

Agricultural Knowledge and Innovation Systems (AKIS)	Output indicators
European Innovation Partnership for agricultural knowledge and innovation (EIP)**	O.1 Number of EIP operational groups
	O.2 Number of advisors setting up or participating in EIP operational groups

Broad type of intervention	Output indicators (per intervention)
CAP support	O.3 Number of CAP support beneficiaries
Decoupled direct support	O.4 Number of ha for decoupled DP
	O.5 Number of beneficiaries for decoupled DP
	O.6 Number of ha subject to enhanced income support for young farmers
	O.7 Number of beneficiaries subject to enhanced income support for young farmers
Risk management tools	O.8 Number of farmers covered by supported risk management instruments
Coupled support	O.9 Number of ha benefitting from coupled support
	O.10 Number of heads benefitting from coupled support
Payments for natural constraints and other region specific constraints	O.11 Number of ha receiving ANC top up (3 categories)
	O.12 Number of ha receiving support under Natura 2000 or the Water Framework Directive
Payments for management commitments (environment-climate, genetic resources, animal welfare)	O.13 Number of ha (agricultural) covered by environment/climate commitments going beyond mandatory requirements
	O.14 Number of ha (forestry) covered by environment/climate commitments going beyond mandatory requirements
	O.15 Number of ha with support for organic farming
	O.16 Number of livestock units covered by support for animal welfare, health or increased biosecurity measures
	O.17 Number of projects supporting genetic resources
Investments	O.18 Number of supported on-farm productive investments
	O.19 Number of supported local infrastructures
	O.20 Number of supported non-productive investments
	O.21 Number of off-farm productive investments
Installation grants	O.22 Number of farmers receiving installation grants
	O.23 Number of rural entrepreneurs receiving installation grants
Cooperation	O.24 Number of supported producer groups/organisations
	O.25 Number of farmers receiving support to participate in EU quality schemes
	O.26 Number of generational renewal projects (young/non-young farmers)

DISCLAIMER

This document is only intended to facilitate the work of the working party on horizontal questions in the context of the ordinary legislative procedure. This document does not anticipate any content of any legislative act. It has no interpretative value.

COMMON OUTPUT INDICATORS USED FOR REPORTING IN THE APR 03/09/2019

	O.27 Number of local development strategies (LEADER)
	O.28 Number of other cooperation groups (excluding EIP reported under O.1)
Knowledge exchange and information	O.29 Number of farmers trained/given advice
	O.30 Number of non farmers trained/given advice
Horizontal indicators	O.31 Number of ha under environmental practices (synthesis indicator on physical area covered by conditionality, ELS, AECM, forestry measures, organic farming)
	O.32 Number of ha subject to conditionality (broken down by GAEP practice)
Sectorial programmes	O.33 Number of producer organisations setting up an operational fund/program
	O.34 Number of promotion and information actions, and market monitoring
	O.35 Number of actions for beekeeping preservation/improvement

*Support to operational Groups under EIP falls under the provisions of cooperation.

DISCLAIMER

This document is only intended to facilitate the work of the working party on horizontal questions in the context of the ordinary legislative procedure. This document does not anticipate any content of any legislative act. It has no interpretative value.

Indicator name	O.1: Number of EIP Operational Groups
Definition	The total number of EIP Operational Group (OG) projects that receive support under one or more of the interventions set out in the CAP strategic plan in the Financial Year concerned.
Types of intervention concerned	The following type of intervention is concerned: <ul style="list-style-type: none"> • Cooperation to prepare or implement EIP OG projects in accordance with Article 114 (Article 71)
Methodology	The number of EIP OG projects, receiving a payment in the Financial Year concerned, should be reported by unit amount . If only a part of the committed amount for an operation was paid in the Financial Year concerned, only a partial output is to be reported (see cover note).
Methodology for the aggregated values	<i>Following aggregates should be provided :</i> - By intervention (if relevant, i.e. when within one intervention several unit amounts are defined) Remark: For these aggregates, there should be <u>no double counting</u> .
Unit of measurement	Number of OG projects
Comments/caveats	The preparation of the OG project as foreseen in Article 13 ('setting up' = drawing up a plan for an innovative project to be developed, as also mentioned in Article 114') counts as a separate operation and can be paid as soon as it is finished and a fully-fledged project proposal is ready for selection. The implementation of the OG project (after selecting it) is another operation. So it is possible to pay for the preparation operation only, and before the project itself is finished. Note that there is always a one-to-one relationship between an EIP OG and its innovative project. An EIP OG can run one project only: the objectives and activities of the OG project are distinctive for that OG. Thus, two different projects are always run by two different EIP OGs, no matter the OG's composition.

DISCLAIMER

This document is only intended to facilitate the work of the working party on horizontal questions in the context of the ordinary legislative procedure. This document does not anticipate any content of any legislative act. It has no interpretative value.

Indicator name	O.2: Number of advisors setting up or participating in EIP Operational Groups (OGs)
Definition	Number of advice actions to help for preparing and/or implementing EIP Operational Group (OG) projects paid in the Financial Year concerned (excluding other type of advice actions reported under O.29).
Types of intervention concerned	<p>Only the following type of intervention is concerned:</p> <ul style="list-style-type: none"> • Knowledge exchange and information (Article 72) <p>This indicator concerns support for advice for innovation purposes incentivising emergence and running of the EIP OG project This support refers either to the project preparation period or to the facilitation during the project implementation of the EIP Operational Group project (or both), and only if the advisor is not paid by the OG project budget (Article 71), but by an intervention under Article 72.</p>
Methodology	<p>The advice actions, paid in the Financial Year concerned, in the frame of innovation support under Article 72, shall be reported per unit amount.</p> <p>If only a part of the committed amount for an operation was paid in the Financial Year concerned only a partial output is to be reported (see cover note)</p>
Methodology for the aggregated values	<p><i>Following aggregates should be provided:</i></p> <p>-By intervention (if relevant, i.e. when within one intervention several unit amounts are defined)</p>
Unit of measurement	Number of advice actions
Comments/caveats	<p>The rationale for this indicator is to measure specific advisory efforts under Article 72 to incentivise innovation, e.g. those in accordance with Article 13(4)(e), i.e. an advisor delivering "<i>innovation support in particular for preparing and for implementing OG projects</i>". Examples could be providing specific advisory services for innovation support, such as coaching farmers towards innovation on their farm, managing an innovation hub, which helps setting up of facilitating OG innovative projects.</p> <p>Support to advisors under Article 71 as part of the funding for the OG project is not included here. These cases are covered under O.1, because the advisor in that case is paid from the OG project budget.</p>

DISCLAIMER

This document is only intended to facilitate the work of the working party on horizontal questions in the context of the ordinary legislative procedure. This document does not anticipate any content of any legislative act. It has no interpretative value.

Indicator name	O.3: Number of CAP support beneficiaries
Definition	The number of CAP support beneficiaries in a Member State i.e. that received support in the Financial Year concerned under one or more of the interventions set out in the CAP strategic plan.
Types of interventions concerned	The following types of interventions are concerned: All CAP interventions set out in the CAP strategic plan by the MS in the form of : <ul style="list-style-type: none"> • direct payments • rural development • sectoral types of interventions
Methodology	Number of beneficiaries who received a payment in Financial Year, per intervention (without double counting). In the case of types of intervention for rural development, beneficiaries are defined in Article 3(h).
Methodology for aggregates	<i>Following aggregates should be provided:</i> <ul style="list-style-type: none"> - Total number of farmers receiving directly support - Total number of farmers beneficiaries of direct payments (Chapter II of Title III) <p>Remarks:</p> <ul style="list-style-type: none"> - For these aggregates, there should be <u>no double counting</u>: i.e. where a beneficiary benefits from multiple interventions, that beneficiary should be counted only once in the aggregate. - Only farmers directly receiving financial support are reported here. In other words, farmers benefitting indirectly from CAP support through actions of producer organisations (PO), training and advice actions, projects implemented under Local Development Strategies (CLLD/Leader), mutual fund, are not taken into account in this indicator.
Unit of measurement	Number of beneficiaries
Comments/caveats	<ul style="list-style-type: none"> - In order to provide these data there will be a need for a unique identifier of each beneficiary (used for all support applications) to avoid double counting between Direct Payments, Rural Development and sectoral types of interventions. - Beekeepers are accounted as farmers. - This indicator is not used for performance clearance.

DISCLAIMER

This document is only intended to facilitate the work of the working party on horizontal questions in the context of the ordinary legislative procedure. This document does not anticipate any content of any legislative act. It has no interpretative value.

Indicator name	O.4: Number of hectares for decoupled direct payments
Definition	The number of hectares paid for the interventions under decoupled direct payments' in the Financial Year concerned.
Types of intervention concerned	The following types of interventions are concerned: <ul style="list-style-type: none"> • The Basic income support for sustainability (BISS) including the round-sum payment for small farmers (Section 2, Subsection 2) • The complementary redistributive income support for sustainability (CRISS) (Article 26) • The complementary income support for Young Farmers (Article 27) • The schemes for the climate and environment (eco-schemes) (Article 28)
Methodology	The number of hectares, paid in Financial Year concerned, shall be reported per decoupled direct payment unit amount .
Methodology for the aggregated values	<p><i>Following aggregates should be provided :</i></p> <ul style="list-style-type: none"> - By intervention (if relevant, i.e. when within one intervention several unit amounts are defined) - The number of hectares for decoupled Direct Payments taken together (i.e. the physical area paid for decoupled Direct Payments) <p>Remark:</p> <p>For these aggregates, there should be <u>no double counting</u>: i.e. where the same hectare benefits from support under multiple decoupled direct payments interventions, that hectare should be counted only once for the aggregate.</p>
Unit of measurement	Number of hectares
Comments/caveats	<ul style="list-style-type: none"> - The output indicator used for the annual clearance will be the number of hectares by intervention (or within an intervention, per unit amount) for all decoupled payments except for the round-sum payment for small farmers for which the number of beneficiaries will be used (see O.5). The number of hectares for the round-sum payment for small farmers will be used for monitoring purposes.

DISCLAIMER

This document is only intended to facilitate the work of the working party on horizontal questions in the context of the ordinary legislative procedure. This document does not anticipate any content of any legislative act. It has no interpretative value.

Indicator name	O.5: Number of beneficiaries for decoupled DP
Definition	The number of CAP support beneficiaries in a Member State that received support in the Financial Year concerned from one or more of interventions under decoupled direct payments set out in the CAP strategic plan.
Types of interventions concerned	<p>The following types of interventions are concerned:</p> <ul style="list-style-type: none"> • The Basic income support for sustainability (BISS) including the round-sum payment for small farmers (Section 2, Subsection 2) • The complementary redistributive income support for sustainability (CRISS) (Article 26) • The complementary income support for Young Farmers (Article 27) • The schemes for the climate and environment (eco schemes) (Article 28)
Methodology	<p><u>Beneficiary for decoupled direct payments</u> = The number of beneficiaries of a decoupled direct payment intervention in Financial Year concerned per intervention.</p> <p>Generally, beneficiaries of direct payments in the Financial year concerned are accounted in full (see cover note). However, if exceptionally the round-sum payment for small farmers was not entirely paid within the Financial Year, beneficiaries should be counted in proportion to the share of payment (see comments/caveats).</p>
Methodology for the aggregated values	<p><i>Following aggregates should be provided:</i></p> <ul style="list-style-type: none"> - The number of beneficiaries of decoupled direct payments taken together. <p>Remark: For this aggregate, there should be <u>no double counting</u>: i.e. where a same beneficiary benefits from multiple interventions, that beneficiary should be counted only once in the aggregate.</p>
Unit of measurement	Number of beneficiaries
Comments/caveats	<p>The detail by unit amount is not requested for this indicator.</p> <p>If exceptionally the round-sum payment for small farmers was not entirely paid within the Financial Year concerned, for the purpose of the performance clearance, the number of beneficiaries of the Round-Sum payment for small farmers should be provided taking into account partial payments, because this direct payment is defined per farmer and thus the performance clearance is done per farmer.</p> <p>The partial number of beneficiaries to be reported corresponds to the share of the payment in the Financial Year concerned in the total amount to be paid. For example, for a small farmer receiving only 90% of the payment in the Financial Year concerned, the reported output is 0.9.</p> <p>By contrast, for the aggregated number of beneficiaries of decoupled payments, the beneficiaries of the round-sum payment for small farmers are accounted in full.</p>

DISCLAIMER

This document is only intended to facilitate the work of the working party on horizontal questions in the context of the ordinary legislative procedure. This document does not anticipate any content of any legislative act. It has no interpretative value.

Indicator name	O.6: Number of ha subject to enhanced income support for young farmers
Definition	The number of hectares paid under complementary income support for Young Farmers in the Financial Year concerned.
Types of intervention concerned	The following type of intervention is concerned: <ul style="list-style-type: none"> • The complementary income support for Young Farmers (Article 27)
Methodology	The number of hectares paid in the Financial Year concerned shall be reported.
Unit of measurement	Number of hectares
Comments/caveats	The value of this indicator should be equal to the value provided under O.4 for the complementary income support for Young Farmers.

DISCLAIMER

This document is only intended to facilitate the work of the working party on horizontal questions in the context of the ordinary legislative procedure. This document does not anticipate any content of any legislative act. It has no interpretative value.

Indicator name	O.7: Number of beneficiaries subject to enhanced income support for young farmers
Definition	The number of CAP support beneficiaries that received support under complementary income support for Young Farmers in the Financial Year concerned.
Types of interventions concerned	The following intervention is concerned: <ul style="list-style-type: none"> • The complementary income support for Young Farmers (Article 27)
Methodology	<u>Beneficiary</u> = The number of farmers receiving complementary income support for Young Farmers in the Financial Year concerned.
Unit of measurement	Number of beneficiaries
Comments/caveats	The value of this indicator should be equal to the value provided under O.5 for the complementary income support for Young Farmers. This indicator is not used for performance clearance.

DISCLAIMER

This document is only intended to facilitate the work of the working party on horizontal questions in the context of the ordinary legislative procedure. This document does not anticipate any content of any legislative act. It has no interpretative value.

Indicator names	O.8: Number of farmers covered by supported risk management instruments
Definition	The total number of farmers or units covered in the Financial Year concerned by one or more of the interventions designed in the CAP strategic plan as crisis prevention and risk management instruments that contribute to ensuring a coherent and integrated approach to risk management in accordance with Article 97(2)(e).
Types of intervention concerned	The following interventions are concerned: <ul style="list-style-type: none"> • Risk management tools (Article 70) • Sectoral types of interventions: <ul style="list-style-type: none"> ○ For F&V: Article 43(2)(a), (d), (e), (f) and (g); ○ For wine sector: Article 52 (1)(c),(d) and (i); ○ For hops, olives oil and table olives sector and ‘other sectors’ defined in Article 39: Article 60(2)(a), (c), (e), (f), (g) and (h) <p>If financial instruments are used to provide farmers with working capital, the output should be reported here.</p>
Methodology	The number of farmers or units paid in the Financial Year concerned, shall be reported per unit amount . The ‘units’ refer to the beneficiary of the support (e.g. <u>farmers</u> for premiums for insurance schemes, <u>funds</u> for mutual funds, <u>hectares</u> for green and non-harvesting, <u>tonnes</u> for withdrawals...). If only a partial payment was made in the Financial Year concerned, only a partial output is to be reported (see cover note).
Methodology for the aggregated values	<i>Following aggregates should be provided :</i> - By intervention (if relevant, i.e. when within one intervention several unit amounts are defined) Remark: Beneficiaries of a combination of installation grant and financial instruments should be counted only once in the total.
Unit of measurement	Number of farmers, hectares, funds or any other units
Comments/caveats	Investments for management of volumes shall be reported under O.21. Replanting of orchards following grubbing-up due to phytosanitary reasons shall be reported under O.18.

DISCLAIMER

This document is only intended to facilitate the work of the working party on horizontal questions in the context of the ordinary legislative procedure. This document does not anticipate any content of any legislative act. It has no interpretative value.

Indicator name	O.9: Number of hectares benefitting from coupled support
Definition	The number of hectares paid under each area-related Coupled Income Support (CIS) intervention in the Financial Year concerned. For interventions under coupled income support that target oilseed crops covered by the Blair House Agreement, the area for which support has been actually paid should be reported as a separate output pursuant to Article 33(4).
Types of intervention concerned	All area-related interventions under coupled income support (Section 3, Subsection 1)
Methodology	The number of hectares, paid in the Financial Year concerned, shall be reported for each area-related CIS intervention . In case within one CIS intervention several unit amounts are defined (e.g. by farm size), the number of hectares paid per unit amount shall be reported.
Methodology for the aggregated values	<i>Following aggregates should be provided :</i> <ul style="list-style-type: none"> - By intervention (if relevant, i.e. when within intervention several unit amounts are defined) - A number of hectares for groups of CIS interventions covering the same sector (i.e. the physical area paid for CIS, per sector). The sectors are set out in Article 30). - A total number of hectares under CIS interventions <p>Remark: For these aggregates, there should be <u>no double counting</u>: i.e. where the same hectare benefits from support under multiple coupled income support interventions, that hectare should be counted only once for the aggregate.</p>
Unit of measurement	Number of hectares
Comments/caveats	It is possible for Member States to pay on the basis of units other than hectares, where appropriate (e.g. acres; decares; etc). However, planning in the CAP plan and reporting in the annual performance report should be done based on the number of hectares.

DISCLAIMER

This document is only intended to facilitate the work of the working party on horizontal questions in the context of the ordinary legislative procedure. This document does not anticipate any content of any legislative act. It has no interpretative value.

Indicator name	O.10: Number of heads benefitting from coupled support
Definition	The number of heads paid for the interventions under each animal-related Coupled Income Support (CIS) intervention in the Financial Year concerned.
Types of intervention concerned	The following types of intervention are concerned: <ul style="list-style-type: none"> All animal-related interventions under coupled income support (Section 3, Subsection 1)
Methodology	The number of heads paid in the Financial Year concerned should be reported for each animal-related CIS intervention and if relevant per unit amount.
Methodology for the aggregated values	<i>Following aggregates should be provided:</i> <ul style="list-style-type: none"> A number of heads for animal-related CIS per sector (i.e. the physical number of heads paid for coupled income support, without double counting, in each sector). The sectors are set out in Article 30.
Unit of measurement	Number of heads Exception: kg of cocoons for silkworms
Comments/caveats	Where appropriate, it is possible for Member States to pay on the basis of another unit than heads of animals (e.g. livestock units). However, planning in the CAP plan and reporting the annual performance report should be done based on a number of heads. In such cases, a conversion key between the unit for payment (LU) and the number of heads should be defined and used consistently.

DISCLAIMER

This document is only intended to facilitate the work of the working party on horizontal questions in the context of the ordinary legislative procedure. This document does not anticipate any content of any legislative act. It has no interpretative value.

Indicator name	O.11: Number of ha receiving ANC top up (3 categories)
Definition	The number of hectares paid under Natural or other area-specific constraints interventions, in the Financial Year concerned.
Types of intervention concerned	The following types of interventions are concerned: <ul style="list-style-type: none"> • Natural or other area-specific constraints (Article 66)
Methodology	The number of hectares, paid in Financial Year concerned, shall be reported for the 3 area categories designated pursuant to Article 32 of Regulation (EU) No 1305/2013, covered by an intervention in the CAP strategic plan: <p>(a) mountain areas;</p> <p>(b) areas, other than mountain areas, facing significant natural constraints; and</p> <p>(c) other areas affected by specific constraints.</p> <p>The number of hectares paid shall be reported per unit amount.</p> <p>If only a partial payment was made in the Financial Year concerned, only a partial output is to be reported (see cover note)</p>
Methodology for the aggregated values	<i>Following aggregates should be provided :</i> <ul style="list-style-type: none"> - Total number of hectares paid under Natural or other area-specific constraints, in the Financial Year concerned
Unit of measurement	Number of hectares
Comments/caveats	

DISCLAIMER

This document is only intended to facilitate the work of the working party on horizontal questions in the context of the ordinary legislative procedure. This document does not anticipate any content of any legislative act. It has no interpretative value.

Indicator name	O.12: Number of ha receiving support under Natura 2000 or the Water Framework Directive
Definition	The number of hectares paid under Area-specific disadvantages resulting from certain mandatory requirements interventions, in the Financial Year concerned.
Types of intervention concerned	The following type of intervention is concerned: <ul style="list-style-type: none"> • Area-specific disadvantages resulting from certain mandatory requirements (Article 67)
Methodology	The number of hectares paid in the Financial Year concerned shall be reported for the following areas, covered by an intervention in the CAP strategic plan: <p>(a) Natura 2000 agricultural and forest areas;</p> <p>(b) other delimited nature protection areas with environmental restrictions applicable to farming or forests;</p> <p>(c) agricultural areas included in river basin management plans pursuant to Directive 2000/60/EC (Water Framework Directive).</p> <p>The number of hectares paid shall be reported per unit amount.</p> <p>If only a partial payment was made in the Financial Year concerned, only a partial output is to be reported (see cover note)</p>
Methodology for the aggregated values	<i>Following aggregates should be provided :</i> By intervention (if relevant, i.e. when within one intervention several average unit amounts are defined)
Unit of measurement	Number of hectares
Comments/caveats	

DISCLAIMER

This document is only intended to facilitate the work of the working party on horizontal questions in the context of the ordinary legislative procedure. This document does not anticipate any content of any legislative act. It has no interpretative value.

Indicator names	O.13: Number of ha (agricultural) covered by environment/climate commitments going beyond mandatory requirements
Definition	The total number of hectares (excluding forestry) covered by environment/climate commitments specified in the CAP Strategic Plans for which a payment was made in the Financial Year concerned.
Types of intervention concerned	The following types of interventions are concerned: <ul style="list-style-type: none"> • Environmental, climate and other management commitments (Article 65): payments for environment/climate commitments. • Sectoral types of interventions: <ul style="list-style-type: none"> ○ For F&V: Article 43(1),(d) to (j) and (l); ○ For wine sector: Article 52(1)(a); ○ For hops, olive oil and table olives and 'other sectors' as defined in Article 39: Article 60(1)(a)(i), (ii), (iii), (vii), (viii), (ix), (xi).
Methodology	The number of hectares paid in the Financial Year concerned shall be reported per unit amount . In case within one intervention several unit amounts are defined, the number of ha paid per unit amount shall be reported. If only a partial payment was made in the Financial Year concerned, only a partial output is to be reported (see cover note)
Methodology for the aggregated values	<i>Following aggregates should be provided :</i> <ul style="list-style-type: none"> - By intervention (if relevant, i.e. when within one intervention several unit amounts are defined) - The number of ha (excluding forestry) under environmental or climate commitments (the physical area paid for environmental or climate commitments) <p>Remark: For these aggregates, there should be <u>no double counting</u>: i.e. where the same hectare benefits from support under multiple environmental or climate commitments, that hectare should be counted only once for the aggregate.</p>
Unit of measurement	Number of hectares
Comments/caveats	Forestry area covered by environment/climate commitments shall be reported under O.14. Any other non-agricultural area covered by these commitments is included in O.13. Area under organic commitments shall be reported under O.15. For sectoral types of interventions not included in LPIS, if the administrative burden to avoid double counting is too high, Member States might simply add the paid area to the sum of hectares paid under rural development interventions.

DISCLAIMER

This document is only intended to facilitate the work of the working party on horizontal questions in the context of the ordinary legislative procedure. This document does not anticipate any content of any legislative act. It has no interpretative value.

Indicator names	O.14: Number of ha (forestry) covered by environment/climate commitments going beyond mandatory requirements
Definition	The total number of hectares (forestry) covered by environment/climate commitments specified in the CAP Strategic Plans for which a payment was made in the Financial Year concerned.
Types of intervention concerned	The following types of interventions are concerned: <ul style="list-style-type: none"> • Environmental, climate and other management commitments (Article 65): Payments for forest environment/climate commitments.
Methodology	The number of hectares paid in the Financial Year concerned, shall be reported per unit amount . If only a partial payment was made in the Financial Year concerned, only a partial output is to be reported (see cover note)
Methodology for the aggregated values	<i>Following aggregates should be provided :</i> <ul style="list-style-type: none"> - By intervention (if relevant, i.e. when within one intervention several unit amounts are defined) - The number of hectares (forestry) under environmental or climate commitments (i.e. the physical area paid for environmental or climate commitments) <p>Remark:</p> <ul style="list-style-type: none"> - For these aggregates, there should be <u>no double counting</u>: i.e. where the same hectare benefits from support under multiple environmental or climate commitments, that hectare should be counted only once for the aggregate.
Unit of measurement	Number of hectares
Comments/caveats	

DISCLAIMER

This document is only intended to facilitate the work of the working party on horizontal questions in the context of the ordinary legislative procedure. This document does not anticipate any content of any legislative act. It has no interpretative value.

Indicator names	O.15: Number of ha with support for organic farming
Definition	The total number of units, hectares or Livestock Units (LU) with support for organic farming specified in the CAP Strategic Plans for which a payment was made in the Financial Year concerned.
Types of intervention concerned	The following types of interventions are concerned: <ul style="list-style-type: none"> • Environmental, climate and other management commitments (Article 65): payments for commitments to convert to or maintain organic farming practices. • Sectoral types of interventions: <ul style="list-style-type: none"> ○ For the F&V sector: Article 43 (1)(c) ○ For hops, olives oil and table olives sector and ‘other sectors’ as defined in Article 39: Article 60(1)(d)
Methodology	The number of units (ha, LU) paid in the Financial Year concerned, shall be reported per unit amount . If only a partial payment was made in Financial Year concerned, only a partial output is to be reported (see cover note)
Methodology for the aggregated values	<i>Following aggregates should be provided :</i> <ul style="list-style-type: none"> - By intervention (if relevant, i.e. when within one intervention several unit amounts are defined) - Total number of ha - Total number of LU
Unit of measurement	Number of hectares or number of LU
Comments/caveats	

DISCLAIMER

This document is only intended to facilitate the work of the working party on horizontal questions in the context of the ordinary legislative procedure. This document does not anticipate any content of any legislative act. It has no interpretative value.

Indicator names	O.16: Number of livestock units covered by support for animal welfare, health or increased biosecurity measures
Definition	The number of livestock units (LU) covered by management commitments for animal welfare, health or increased biosecurity measures specified in the CAP Strategic Plans for which a payment was made in the Financial Year concerned.
Types of intervention concerned	The following types of interventions are concerned: <ul style="list-style-type: none"> • Environmental, climate and other management commitments paid per LU (Article 65): animal welfare commitments • Sectoral types of interventions: <ul style="list-style-type: none"> ○ Actions paid per LU for animal health and welfare (Article 60(1)(a)(vi))
Methodology	The number of Livestock units (LU) paid in the Financial Year concerned, shall be reported per unit amount . In case within one intervention several unit amounts are defined, the number of LU paid per unit amount shall be reported. If only a partial payment was made in the Financial Year concerned, only a partial output is to be reported (see cover note).
Methodology for the aggregated values	<i>Following aggregates should be provided :</i> <ul style="list-style-type: none"> - By intervention (if relevant, i.e. when within one intervention several unit amounts are defined) - The number of LU under commitments for animal welfare, health or increased biosecurity measures (without double counting)
Unit of measurement	Number of LU
Comments/caveats	The coefficients to convert animal numbers in Livestock Units are published by EUROSTAT, see here . Investments related to animal welfare, animal health and biosecurity shall be reported under O.18.

DISCLAIMER

This document is only intended to facilitate the work of the working party on horizontal questions in the context of the ordinary legislative procedure. This document does not anticipate any content of any legislative act. It has no interpretative value.

Indicator names	O.17: Number of projects supporting genetic resources
Definition	The total number of operations supporting genetic resources, livestock units (LU) of endangered breeds and hectares of endangered plant varieties covered by supported management commitments paid in the Financial Year concerned.
Types of intervention concerned	The following type of intervention is concerned: <ul style="list-style-type: none"> • Environmental, climate and other management commitments (Article 65): payments for endangered breeds/plants varieties and genetic resources.
Methodology	The number of operations, LU and hectares paid in the Financial Year concerned, shall be reported per unit amount . If only a partial payment was made in Financial Year concerned, only a partial output is to be reported (see cover note).
Methodology for the aggregated values	<i>Following aggregates should be provided :</i> <ul style="list-style-type: none"> - By intervention (if relevant, i.e. when within one intervention several unit amounts are defined)
Unit of measurement	Number of relevant unit: operations, LU or hectares
Comments/caveats	

DISCLAIMER

This document is only intended to facilitate the work of the working party on horizontal questions in the context of the ordinary legislative procedure. This document does not anticipate any content of any legislative act. It has no interpretative value.

Indicator names	O.18: Number of supported on-farm productive investments
Definition	<p>The total number of supported on-farm productive investments operations for which a payment (grants, financial instruments¹ or a combination of both) was made in the Financial Year concerned.</p> <p>In the case of sectoral types of intervention implemented through operational programmes of producer organisations (PO), on-farm productive investments are those implemented at farm (PO members) level while productive investments at the level of the PO are off-farm productive investments. The latter shall be reported under O.21.</p>
Types of interventions concerned	<p>The following types of interventions are concerned:</p> <ul style="list-style-type: none"> • Investments: Article 68 • Sectoral types of interventions <ul style="list-style-type: none"> ○ For F&V sector: Article 43(1)(a), (2)(b) and (2)(c), ○ For wine sector: Article 52(1) (a), (b) and (e), ○ For hops, olives oil and table olives sector and 'other sectors' defined in Article 39: Article 60(1)(a), (2)(b) and (2)(c).
Methodology	<p>The number of supported on-farm productive investments operations for which payments were made in the Financial Year concerned shall be reported per average unit amount.</p> <p>If one or more instalments are paid before the final payment for an operation, only a partial output is to be reported (see cover note)</p>
Methodology for the aggregated values	<p><i>Following aggregates should be provided :</i></p> <ul style="list-style-type: none"> - By intervention (if relevant, i.e. when within one intervention several average unit amounts are defined) - A total number of supported on-farm productive investment operations <p>Remark: Beneficiaries of a combination of installation grant and financial instruments should be counted only once in the total.</p>
Unit of measurement	Number of investment operations <u>or units²</u>
Comments/caveats	In their CAP plans, MS should link their interventions to those output indicators they consider relevant. Generally, on-farm investments are related to agricultural activities. Productive investments generally lead to an increase in profitability or value. In the majority of cases, it will be

¹ In case of guarantee financial instruments, guarantee commitments linked to disbursed loans.

Indicator names	O.19: Number of supported local infrastructures
Definition	The total number of supported investments in infrastructure for which a payment (grants, financial instruments ³ or a combination of both) was made in the Financial Year concerned.
Types of interventions concerned	The following type of interventions is concerned: <ul style="list-style-type: none"> • Investments (Article 68)
Methodology	The number of supported infrastructure operations for which payments were made in the Financial Year concerned shall be reported per average unit amount . If one or more instalments are paid before the final payment for an operation, only a partial output is to be reported (see cover note)
Methodology for the aggregated values	<i>Following aggregates should be provided :</i> <ul style="list-style-type: none"> - By intervention (if relevant, i.e. when within one intervention several average unit amounts are defined) - A total number of supported local infrastructure investment operations <p>Remark: Beneficiaries of a combination of installation grant and financial instruments should be counted only once in the total.</p>
Unit of measurement	Number of investment operations.
Comments/caveats	

³ In case of guarantee financial instruments, guarantee commitments linked to disbursed loans.

DISCLAIMER

This document is only intended to facilitate the work of the working party on horizontal questions in the context of the ordinary legislative procedure. This document does not anticipate any content of any legislative act. It has no interpretative value.

Indicator names	O.20: Number of supported non-productive investments
Definition	The total number of supported non-productive investment operations for which a payment was made in the Financial Year concerned.
Types of interventions concerned	The following types of interventions are concerned: <ul style="list-style-type: none"> • Investments: Article 68 • Sectoral types of intervention <ul style="list-style-type: none"> ○ For F&V sector: Article 43(1)(a) ○ For wine sector: Article 52(1)(a) ○ For hops, olives oil and table olives sector and ‘other sectors’ as defined in Article 39: Article 60(1)(a) with regard to investments
Methodology	The number of supported non-productive investment operations for which payments have been made in the Financial Year concerned shall be reported per average unit amount . If one or more instalments are paid before the final payment for an operation, only a partial output is to be reported (see cover note)
Methodology for the aggregated values	<i>Following aggregates should be provided :</i> <ul style="list-style-type: none"> - By intervention (if relevant, i.e. when within one intervention several average unit amounts are defined) - A total number of supported non-productive investment operations
Unit of measurement	Number of investment operations <u>or units</u> ⁴
Comments/caveats	In general, non-productive investments are investments that do not lead to any significant increase in value or profitability. Typically, they aim at purely environmental improvements and are linked to the achievement of agri-environment-climate objectives set out in points (d), (e) and (f) of Article. 6(1). Examples would be the creation and/or restoration of landscape features, such as wetlands, hedges, dry-stone walls and traditional boundaries, or the creation and/or restoration of habitat or landscape elements, such as heathland, species-rich grassland or floristically enhanced grass margins.

⁴ [This reflects the changes to Annex I proposed by the Romanian Presidency](#)

DISCLAIMER

Indicator names	O.21: Number of off-farm productive investments
Definition	The total number of supported off-farm productive investment operations for which a payment (grants, financial instruments ⁵ or a combination of both) that was made in the Financial Year concerned.
Types of intervention concerned	The following types of interventions are concerned: <ul style="list-style-type: none"> • Investments: Article 68 • Sectoral types of intervention <ul style="list-style-type: none"> ○ For F&V sector: Articles 43(1)(a), (2)(b) and (2)(c), ○ For wine sector: F52(1) (a), (b) and (e), ○ For hops, olives oil and table olives sector and ‘other sectors’ as defined in Article 39: Articles 60(1)(a), (2)(b) and (2)(c).
Methodology	The number of supported off-farm productive investment operations for which payments were made (advances excluded) in the Financial Year concerned shall be reported per average unit amount . If one or more instalments are paid before the final payment for an operation, only a partial output is to be reported (see cover note)
Methodology for the aggregated values	<i>Following aggregates should be provided :</i> <ul style="list-style-type: none"> - By intervention (if relevant, i.e. when within one intervention several average unit amounts are defined) - A total number of supported on-farm productive investment operations <p>Remark: Beneficiaries of a combination of installation grant and financial instruments should be counted only once in the total.</p>
Unit of measurement	Number of investment operations
Comments/caveats	In the case of sectoral types of intervention implemented through operational programmes of producer organisations (PO), off-farm productive investments are implemented at the level of producer organisation (PO), while on-farm productive investments are implemented at farm level by PO members. The latter shall be reported under O.18. In their CAP plans, MS should link their interventions to those output indicators they consider relevant. Generally, off-farm investments are related to non-agricultural activities. An investment is productive if it leads to an increase in profitability or value. In the majority of cases, it will be evident to which category an investment belongs. However, where an investment could be classified as either on-farm or off-farm, the Commission will accept the classification proposed by the MS.

⁵ In case of guarantee financial instruments, guarantee commitments linked to disbursed loans

Indicator name	O.31 Number of ha under environmental practices (synthesis indicator on physical area covered by conditionality, ELS, AECM, forestry measures, organic farming)
Definition	The physical number of hectares under conditionality with regard to GAEC and other interventions promoting practices beneficial for environment and climate with CAP support.
Types of intervention* concerned ⁸	All agricultural and forestry area under practices beneficial for environment and climate due to: <ul style="list-style-type: none"> • Conditionality with regard to GAEC • Eco-schemes • Agri-and forest- environmental, climate and other management commitments • Sectoral types of intervention
Methodology	<p>Total number of hectares subject to conditionality and hectares for which interventions listed above were paid in the Financial year concerned. Hectares are accounted only once for this indicator (i.e. physical area, without double counting). A practical example is indicated in the next page.</p> <p>Three sub-indicators shall be calculated according to definition of the indicator and the methodology:</p> <ul style="list-style-type: none"> • Total agricultural area under environmental practices (under conditionality or paid for the interventions listed above) • Total agricultural area paid for the interventions listed above (i.e. excluding the area only under GAEC – as measured under indicator O.32) • Total forestry area paid for the interventions listed above
Unit of measurement	Number of hectares
Comments/caveats	<p>All eligible area subject to conditionality shall be reported under this indicator. In case the Member State will apply a pro rata system on permanent grassland, only eligible areas (e.g. after the application of pro rata) should be reported.</p> <p>There is a risk of double counting between sectoral types of interventions and other interventions, as sectoral types of interventions are not in IACS (except for wine). However, the risk of double counting is estimated to be low, because often the 2 types of support are granted on different farms. Therefore the hectares concerned under sectoral types of interventions should simply be added to the hectares under other area-based payments.</p> <p>The same may be true of management commitments undertaken by beneficiaries who are not farmers.</p> <p>This indicator is not used for performance clearance.</p>

⁸ Conditionality is included in this output indicator although it is not an intervention.

DISCLAIMER

Indicator name	O.32 Number of ha subject to conditionality (broken down by GAEC practice)
Definition	<p>Number of hectares paid, in the Financial Year concerned, reported for each GAEC separate practice as indicated in Annex III.</p> <p>The total number of hectares in the scope of GAEC practices (e.g. areas eligible for decoupled direct payments) is not included in this indicator as already reported through indicator “O.4 Number of hectares for decoupled payments”</p> <p>For each GAEC the main land use (reference to Article 4 of the CAP plan Regulation, land use on which the GAEC could be applicable: arable land AL, permanent grassland PG, permanent crops PC) is indicated as a further breakdown of the indicator.</p> <p>This information is necessary to express the GAEC areas in its appropriate context (e.g. GAEC 1 PG ratio is applicable only to PG: if this information is not provided, the only possible comparison will be on total agricultural area).</p> <p>Aggregated indicators</p> <ul style="list-style-type: none"> • At least one GAEC: areas on which at least one GAEC is applied (synthesis indicator) • Aggregation by objectives (as defined in Annex 3) without double counting <ul style="list-style-type: none"> ○ Climate change: GAEC 1 + 2 + 3 ○ Water: GAEC 4 + 5 ○ Soil: GAEC 6 + 7 + 8 ○ Biodiversity: GAEC 9 + 10 <p>Detailed indicators including breakdowns:</p> <ul style="list-style-type: none"> • GAEC 1: <ul style="list-style-type: none"> ○ PG areas used for the determination of the PG ratio ○ Utilised agricultural area (UAA) used for the determination of the PG ratio ○ PG ratio (PG/UAA) expressed in percentage • GAEC 2: <ul style="list-style-type: none"> ○ areas of peatland (AL, PG, PC) ○ areas of wetlands (AL, PG, PC) • GAEC 3: areas subject to the ban of burning arable stubble (AL) • GAEC 4: areas of buffer strips (AL, PG, PC) • GAEC 5: areas subject to the use of FaST (AL, PG, PC) • GAEC 6: areas (AL, PG, PC) subject to tillage management • GAEC 7: areas (AL, PC) subject to no bare soil in sensitive periods (including normal winter crops which contribute to the requirement) • GAEC 8: areas (AL) subject to crop rotation • GAEC 9 (indicative breakdown based on current EFA types (LF: landscape features) is provided; an intermediate level could be elaborated aggregating some categories): <ul style="list-style-type: none"> ○ Total agricultural areas subject to GAEC 9 requirements

DISCLAIMER

	<p>(AL, PG, PC)</p> <ul style="list-style-type: none"> ○ Hectares of non productive areas/features used for the calculation of the share <ul style="list-style-type: none"> ▪ Land lying fallow ▪ Land lying fallow with melliferous plants ▪ Terraces ▪ LF - Hedges, wooded strips and trees in line ▪ LF - Isolated trees ▪ LF - Field copses ▪ LF - Field margins/strips ▪ LF - Ponds ▪ LF - Ditches ▪ LF - Traditional stone walls ▪ LF - Other landscape features ▪ Afforested areas ○ Areas subject to retention of landscape features (breakdown by type, see above, only for landscape features) <ul style="list-style-type: none"> ● GAEC 10: areas (PG) subject to ban of converting/ploughing
Types of intervention concerned ⁹	Conditionality with regard to GAEC practices
Unit of measurement	Number of hectares , % for the PG ratio
Comments/caveats	<ul style="list-style-type: none"> - Data for SMR are not included in this indicator and in any other output indicator listed in Annex 1 because they originate in non CAP legislation - The total number of 'physical' hectares without double counting is also required, because it is key information to communicate and steer the policy. As GAEC areas are not included in any result indicators, aggregation by “main issue” (Annex 3) is essential to calculate GAEC areas by environmental objective. - In order to be consistent with the methodology applied for other indicators based on interventions and to simplify the calculation, only paid and eligible areas should be reported for this indicator, even if conditionality is applied on a broader base (e.g. including all agricultural land of the holding). In case the Member State will apply a pro rata system on permanent grassland, only eligible areas (e.g. after the application of pro rata) should be reported. - The possibility for Member States to use conversion and/or weighting factors for GAEC 4 and 9 should be taken in consideration. The indicator will be based at least on physical areas (not weighted) however also the weighted areas are necessary to compare with the % threshold. - Methodology and breakdowns proposed are based on the current experience on greening output indicators, including the breakdown by main land use. This indicator is not used for performance clearance.

⁹ Conditionality is included in this output indicator although it is not an intervention.
